TASK 2 | Ready for a Shared-Living Experience?

1.1 Main Ideas — Sample Answer

The main ideas of the text are about living with other people. Sharing a home can help students save money and make friends. However, students may face problems with noise and privacy. They should respect each other and follow rules to live happily together.

1.2 Opinion Writing — Sample Answer (150+ words)

In my opinion, sharing a home with other students can be a good experience. I would like to share an apartment when I go to university because I could make new friends and learn to be more responsible. Living with other students may also help me feel less lonely when I am away from my family.

Shared living has many **advantages**. Students can share the cost of rent, food, and electricity. They can study together and help each other with difficult lessons. **However**, there are some **disadvantages** too. One person may be noisy when another person wants to sleep or study. Students may also disagree about cleaning and personal space.

I think students must follow clear house rules to live happily together. Everyone should help clean the kitchen and bathroom, keep noise low at night, and pay their share of the bills on time. Students should also respect each other's privacy and talk politely when problems happen.

In conclusion, I believe shared living can be enjoyable if everyone is kind, helpful, and responsible.
